DOC-12: Testing Strategy & QA Plan

Version: 1.0 | **Status:** APPROVED | **Date:** 2026-08-27 **Purpose:** Establish testing frameworks, philosophy, and CI requirements. **Owner:** DevOps Architect

Testing Philosophy

- Every meaningful feature must include tests.
- **Definition of Done:** Requirement implemented, UI/API implemented, Validation added, Authorization added, Tests added, CI passes.

Test Types & Tools

- **Unit Tests:** Business logic validation (Vitest).
- **Integration Tests:** Module + database/API interactions (NestJS testing utilities).
- **Component Tests:** Frontend UI isolation (Vitest / React Testing Library).
- **E2E Tests:** Critical user workflows (Playwright).

Critical Workflows (Must have E2E)

- User Registration & Email Verification.
- Login, Logout, Password Reset.
- Organization Creation & Setup.
- Invite User & Assign Role.
- Permission Enforcement verification.
