DOC-13: Git & Development Workflow

Version: 1.0 | **Status:** APPROVED | **Date:** 2026-08-27 **Purpose:** Define repository, branching, and commit strategies. **Owner:** DevOps Architect

Repository Strategy

- **Monorepo:** pnpm workspaces.
- apps/web (Next.js), apps/api (NestJS).
- packages/ui, packages/types, packages/config.

Branching & Pull Requests

- main (production), develop (staging).
- feature/*, fix/*.
- All code goes through Pull Requests with mandatory Code Review.

Commit Convention

- Use **Conventional Commits**:
 - feat: new features (e.g., feat: add organization management)
 - fix: bug fixes (e.g., fix: resolve login validation issue)
 - refactor:, test:, docs:, chore:

CI Checks

- Push -> Lint -> Type Check -> Unit Test -> Build -> E2E -> Deploy.
- CI pipeline required for all PRs.
