DOC-24: Architecture Decision Record Index

Version: 1.0 | **Status:** APPROVED | **Date:** 2026-08-27 **Purpose:** Track major architecture decisions. **Owner:** Senior Software Architect

ADR-001: Modular Monolith

- **Context:** Deciding backend architecture style.
- **Decision:** Use NestJS Modular Monolith instead of Microservices.
- **Reason:** Microservices introduce unnecessary DevOps, deployment, and data consistency complexity for this project stage.
- **Status:** APPROVED

ADR-002: Frontend Framework

- **Context:** Selecting frontend tooling.
- **Decision:** React + TypeScript + Vite + Tailwind + shadcn/ui.
- **Reason:** Strong ecosystem, excellent for enterprise dashboards, high developer velocity.
- **Status:** APPROVED

ADR-003: Database and ORM

- **Context:** Selecting data layer.
- **Decision:** PostgreSQL with Prisma ORM.
- **Reason:** ACID compliance, JSONB support for custom fields, type-safe queries via Prisma.
- **Status:** APPROVED
